

# Small Cap Growth Fund

**Retail Class: CSMVX | Institutional Class: CSMCX**
**Investment objective: Long-term capital growth**

**The Fund seeks companies that demonstrate changes in growth at consistently higher levels of profitability than other companies in their respective industries. The strategy emphasizes companies with the requisite resources in managerial, financial, product and/or technical strength to drive outperformance through a full market cycle.**

## Hypothetical Growth of a \$10,000 Investment

Institutional Shares - 12/31/2007 - 12/31/2017

This Chart is for illustrative purposes and does not imply future performance. Assuming reinvestment of dividends and capital gains, but does not reflect the effect of any applicable sales charge or redemption fees.

Effective at the close of business on September 15, 2017, the Century Small Cap Select Fund, a series of Century Capital Management Trust (the "Predecessor Fund"), reorganized into the Fund, a series of Professionally Managed Portfolios (the "Reorganization"). Performance information shown prior to the close of business on September 15, 2017 is that of the Predecessor Fund. Accordingly, the returns of the Institutional Class are the returns of the Predecessor Fund's Institutional Class. Returns of the Retail Class shown in the table below reflect the returns of the Investor Class of the Predecessor Fund.

Minimum Investment	\$2,000	\$500,000

Minimum investment for institutional class may be:

- waived or reduced by Advisor at any time; or
- met by aggregation of customer accounts to accumulate requisite minimum

**Mutual Fund investing involves risk. Principal Loss is possible. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. Investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations and illiquidity. Growth stocks can perform differently from the market as a whole and from other types of stocks. Growth stocks tend to be sensitive to changes in the earnings of their underlying companies and more volatile than other types of stocks, particularly over the short term.**

Before investing, investors should carefully consider the Fund's investment objectives, risks, charges and expenses. The summary and statutory prospectuses contain this and other important information about the investment company, and it may be obtained by calling 800-542-7888 or visiting [www.congressasset.com/funds](http://www.congressasset.com/funds). Read the prospectus carefully before investing.

**Definitions:** **Russell 2000 Growth Index®** measures the performance of Russell small cap companies with higher price-to-book ratios and higher forecasted growth value **Price/Book** ratio used to compare a company's current market price to its book value **Price/Earnings** valuation of a company's share price compared to its earnings per share; commonly used by investors to determine the value of a company **Weighted Average Market Cap** is the portfolio-weighted mean capitalizations of all equity securities. **Active Share** describes the percentage of the portfolio that is different from the benchmark. **Beta** measures the volatility of the fund, as compared to that of the overall market. The Market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. **Alpha** is an annualized return measure of how much better or worse a fund's performance is relative to an index of funds in the same category, after allowing for differences in risk. **Standard Deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 monthly returns. It is not possible to invest directly in an index.
