The information throughout this presentation is for illustrative purposes and is subject to change at any time. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts

Market conditions can vary widely over time and can result in a loss of portfolio value. Holdings and sector weightings are subject to change and should not be considered investment advice or a recommendation to buy or sell a particular security. Actual holdings may vary by client. This managed account strategy involves risk, may not be profitable, may not achieve its objective, and may not be suitable or appropriate for all investors. Investors should consider the investment objectives, risks, and fees of this strategy carefully with their financial professional before investing.

Risks include credit risk, defaulted securities risk, extension risk, interest rate risk, prepayment risk, high yield securities (“Junk Bond”) risk, and sector focus risk. A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. Investors could lose money if the issuer or guarantor of a fixed income security, or the counterparty of a derivatives contract or repurchase agreement, is unable or unwilling to make a timely payment of principal and/or interest, or to otherwise honor its obligations. Credit ratings do not provide assurance against default or other loss of money.

Information About GIPS Composite

#The "Total Firm Assets" column includes unified managed account (UMA) assets

Congress Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Congress Asset Management has been independently verified for the periods 1/1/96 – 12/31/24. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information: Congress Asset Management Co. (CAM) is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. CAM manages a variety of public equity, private equity, fixed income, and ETF managed portfolios for private and institutional clients. CAM acquired Prelude Asset Management LLC on March 15, 2010. Composite performance results and total firm assets managed by Jeffrey Porter, from July 1, 2002 to March 15, 2010 were realized while employed at Prelude Asset Management LLC. CAM merged with Congress Capital Partners, LLP on June 30, 2015. CAM acquired certain strategies of Century Capital Management, LLC on September 15, 2017.

Composite Characteristics: The Core Fixed Income Composite was created in September 2009 and the inception date is July 1, 2002. The composite includes all fully discretionary portfolios with a value over \$1 million (US dollars) managed in the core fixed income style for a minimum of one full month. There are no limits on the amount of US Treasury holdings allowed. Accounts generally have a duration range of +/- 1 year of the benchmark's duration. At the time of purchase, credit ratings of individual securities should be rated Baa3/BBB- or higher by at least two Nationally Recognized Credit Rating Agencies. And no more than 20% in total assets in MBS/ABS securities are allowed. At the time of purchase, MBS and ABS securities must have a credit rating of Aaa/AAA by the Nationally Recognized Credit Rating Agencies. Prior to October 1, 2013, there was no minimum value for inclusion. Accounts with wrap commissions are excluded from the composite. The composite benchmark is the Bloomberg US Aggregate Index. The benchmark returns are not covered by the report of independent verifiers. Closed account data is included in the composite as mandated by the standards in order to eliminate a survivorship bias. A list of composite descriptions, a list of broad distribution pooled funds, and a list of limited distribution pooled fund descriptions are available upon request.

Calculation Methodology: Valuations and returns are computed and stated in U.S. dollars. Gross of fees returns are calculated gross of management and custodial fees and net of transaction costs. Prior to January 1st, 2021, net of fees returns are calculated by reducing gross returns by 1/4th of the highest stated management fee, which is 0.40%, applied quarterly. Effective January 1st, 2021, net of fee returns are calculated on a daily basis by reducing the daily gross return by a daily equivalent of the highest stated management fee. Accruals for fixed income securities are included in calculations. Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fees returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.

Fee Schedule: The Core Fixed Income fee schedule is as follows: 0.40% for first \$5-25 million, 0.35% for next \$25 million, 0.25% for next \$25 million and 0.20% for \$75 million and up. The above fee schedule may be subject to negotiation where circumstances warrant. As fees are deducted quarterly, the compounding effect will increase the impact of the fees by an amount directly related to the gross account performance. For example, an account earning a 10% annual gross return with a 0.40% annual fee deducted quarterly would earn a 9.6% annual net return due to compounding.

Other Disclosures: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value. GIPS® is a registered trademark of CFA Institute.
