Investing in the stock market involves risks, and may not be suitable for all investors. Growth stocks tend to be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Investing in large sized companies may involve risk as these companies may be unable to respond quickly to new competitive challenges like changes in consumer tastes or the innovation of smaller competitors. Investing in large cap companies may involve the risk as these companies may be unable to attain the high growth rates of successful smaller companies, especially during extended period of economic expansion.

Information About GIPS Composite

#The “Total Firm Assets” column includes unified managed account (UMA) assets

Congress Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Congress Asset Management has been independently verified for the periods 1/1/96 – 12/31/24. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm’s policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Large Cap Growth Composite has had a performance examination for the periods 1/1/96 – 12/31/24. The verification and performance examination reports are available upon request.

Firm Information: Congress Asset Management Co. (CAM) is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. CAM manages a variety of public equity, private equity, fixed income, and ETF managed portfolios for private and institutional clients. CAM acquired Prelude Asset Management, LLC on March 15, 2010. CAM merged with Congress Capital Partners, LLP on June 30, 2015. CAM acquired certain strategies of Century Capital Management, LLC on September 15, 2017.

Composite Characteristics: The Large Cap Growth Composite was created on January 1, 1993, and the inception date of the composite is January 1, 1985, which reflects the first full month in which an account was fully invested in the strategy and met the inclusion criteria. The composite includes all fully discretionary portfolios with a value over \$100 thousand (US dollars) managed in the large cap growth style for a minimum of one full month. The large cap growth strategy invests in the equity of high-quality companies with market capitalizations greater than \$5 billion exhibiting consistent earnings growth. The strategy may also invest from time to time in equity securities with capitalizations between \$1 billion and \$5 billion. Accounts with wrap commissions are excluded from the composite. Prior to January 1, 2016, the composite minimum was \$500 thousand (US dollars). Prior to September 1, 2005, the composite did not include taxable accounts, private client accounts, or accounts with less than \$1 million. The primary composite benchmark is the S&P 500 Index. The secondary benchmark is the Russell 1000 Growth Index. The benchmark returns are not covered by the report of independent verifiers. Closed account data is included in the composite as mandated by the standards in order to eliminate a survivorship bias. A list of composite descriptions, a list of broad distribution pooled funds, and a list of limited distribution pooled fund descriptions are available upon request.

Calculation Methodology: Valuations and returns are computed and stated in U.S. dollars. Gross of fees returns are calculated gross of management and custodial fees and net of transaction costs. Prior to 2007 net of fees returns were calculated by reducing gross returns by 1/4th of the highest management fee in the Large Cap Growth Composite, which was 1.00%, applied quarterly. Effective January 1, 2007, net of fees returns are calculated using actual management fees. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Accruals for equity securities are included in calculations. Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fees returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite, and the benchmark returns over the preceding 36-month period. Prior to January 1, 1993, the composite is not in compliance with GIPS.

Fee Schedule: The firms’ individual account fee schedule is as follows: 1.00% for first \$1 million, 0.80% for next \$4 million, 0.60% for next \$5 million. Management fees for individual accounts with assets under management exceeding \$10 million, and for institutional accounts are negotiated. The individual account fee schedule may be subject to negotiation where circumstances warrant. As fees are deducted quarterly, the compounding effect will increase the impact of the fees by an amount directly related to the gross account performance. For example, an account earning a 10% annual gross return with a 1% annual fee deducted quarterly would earn an 8.9% annual net return due to compounding.

Other Disclosures: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value. GIPS® is a registered trademark of CFA Institute. Definitions:

The Russell 1000 Growth Index measures the performance of the Large cap growth segment of the US equity universe. It includes those Russell 1000 companies with higher price-to-value ratios and higher forecasted growth values. Indices are unmanaged. It is impossible to invest directly in an index. The performance of an index does not reflect any transaction costs, management fees, or taxes. **S&P 500 Index** is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks. Indices are unmanaged. It is impossible to invest directly in an index. The performance of an index does not reflect any transaction costs, management fees, or taxes.
