Disclosure

Past performance does not guarantee future results.

The information throughout this presentation is for illustrative purposes and is subject to change at any time. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts

Market conditions can vary widely over time and can result in a loss of portfolio value. Holdings and sector weightings are subject to change and should not be considered investment advice or a recommendation to buy or sell a particular security. Actual holdings may vary by client. This managed account strategy involves risk, may not be profitable, may not achieve its objective, and may not be suitable or appropriate for all investors. Investors should consider the investment objectives, risks, and fees of this strategy carefully with their financial professional before investing.

Investing in the stock market involves risks, and may not be suitable for all investors. Value stocks may not increase in price if other investors fail to recognize the company's value or the factors that are expected to increase the price of the security do not occur. Over market cycles, different investment styles may sometimes outperform other investment styles (for example, growth investing may outperform value investing). Investing in smaller companies involves greater risks than investing in larger, more established ones. The securities of companies with smaller market capitalizations often are less widely held and trade less frequently and in lesser quantities, and their market prices often fluctuate more, than the securities of companies with larger market capitalizations

Information About GIPS Composite

#The “Total Firm Assets” column includes unified managed account (UMA) assets

Congress Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Congress Asset Management has been independently verified for the periods 1/1/96 – 12/31/25. The verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information: Congress Asset Management Co. (CAM) is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. CAM manages a variety of public equity, private equity, fixed income, and ETF managed portfolios for private and institutional clients. CAM acquired Prelude Asset Management, LLC on March 15, 2010. CAM merged with Congress Capital Partners, LLP on June 30, 2015. CAM acquired certain strategies of Century Capital Management, LLC on September 15, 2017.

Composite Characteristics: The Small Cap Value Composite was created on March 31, 2014 and the inception date is November 1, 2010. Performance prior to September 15, 2017, was generated by Century Capital Management, LLC. Performance prior to March 1, 2014 was generated before the Portfolio Manager became affiliated with Century Capital Management, LLC. The Portfolio Manager was the only individual responsible for selecting securities to buy and sell and the investment decision-making process remained intact. Accordingly, composite performance is linked to performance generated prior to March 1, 2014. Because CAM acquired certain strategies of Century Capital Management, LLC on September 15, 2017, Total Firm Assets are shown as n/a for periods prior to the acquisition date. All portability requirements with respect to GIPS have been met. The composite includes all fully discretionary portfolios with a value over \$100 thousand (US dollars) managed in the small cap value style for a minimum of one full month. The small cap value strategy generally invests in the equity of companies with market capitalizations between \$50 million and \$5 billion or that are within the range of the Russell 2000 Value Index (at the time of purchase) that trade at a discount to intrinsic value or whose earnings growth is under appreciated by the street. Prior to October 1, 2017, there was no minimum value for inclusion. The composite contained proprietary non-fee-paying assets which represented 100% of total composite assets as of December 31, 2014 and 0.14% of composite assets as of December 31, 2015 and 0.17% as of December 31, 2016. The benchmark is the Russell 2000 Value Index. The benchmark returns are not covered by the report of independent verifiers. Closed account data is included in the composite as mandated by the standards in order to eliminate a survivorship bias. A list of composite descriptions, a list of broad distribution pooled funds, and a list of limited distribution pooled fund descriptions are available upon request.

Calculation Methodology: Valuations and returns are computed and stated in U.S. dollars. Gross of fees returns are calculated gross of management and custodial fees and net of transaction costs. Prior to January 1st, 2021, net of fees returns are calculated by reducing monthly gross returns by 1/12th of the maximum applicable annual management fee, which is 0.95%. Effective January 1st, 2021, net of fee returns are calculated on a daily basis by reducing the daily gross return by a daily equivalent of the highest stated management fee. For periods ended on or before March 31, 2011, the maximum applicable management fee was 1% on the first \$50 million. For periods beginning after March 31, 2011, the maximum applicable management fee is 0.95% on the first \$50 million of assets. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Accruals for equity securities are included in calculations. Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fees returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite, and the benchmark returns over the preceding 36-month period.

Fee Schedule: The firms' individual account fee schedule is as follows: 1.00% for first \$1 million, 0.80% for next \$4 million, 0.60% for next \$5 million. Management fees for individual accounts with assets under management exceeding \$10 million, and for institutional accounts are negotiated. The individual account fee schedule may be subject to negotiation where circumstances warrant. As fees are typically deducted quarterly, the compounding effect will increase the impact of the fees by an amount directly related to the gross account performance. For example, an account earning a 10% annual gross return with a 1% annual fee deducted quarterly would earn an 8.9% annual net return due to compounding.

Other Disclosures: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Definition:

The Russell 2000 Value Index measures the investment results of an index composed of small-capitalization U.S. equities that exhibit value characteristics. Indices are unmanaged. It is impossible to invest directly in an index. The performance of an index does not reflect any transaction costs, management fees, or taxes.
